Fig. FIRE DRAGON jacket NL Utrecht, YA23, 010 &  
FIRE SURVIVOR trousers NL Utrecht, YA23, 010.

## WE ARE ONLY SATISFIED WITH THE VERY BEST.

### AIR X BLOCKER®

The insulation system in the shoulder area guarantees more safety through a permanent air cushion that rises from protectors in the inner lining and also stays upright when carrying respiratory protective equipment. The trapped air isolates this exposed area.

### HPX SYSTEM®

With the HPX System®, changing a defective zip is no longer expensive and complicated, but simple and affordable. Through the High Performance eXchange System, or HPX System, the lifespan of protective clothing is increased significantly. In addition, thanks to the striking design it is immediately visible whether or not the front part is fully closed. That makes it even safer.

EU Patent 07121066.0

### ERGO X PAD®

The EXPORT Ergopad® is a cushioned, ergonomically preformed knee pad that fits the knee in every place and avoids creating pressure marks. It is flame-resistant and does not become saturated with water, in contrast to the aramid non-woven padding, so that the trousers dry much more quickly after washing.

### WICKING X BARRIER®

The wicking barrier is permanently waterproof, breathable and wash-resistant. That means even after many uses and washes, the clothing's lining remains completely dry thanks to the GORE-TEX barrier, as no more moisture can enter through the seams.

100% waterproof

# THE INNOVATIVE MATERIAL COMPOSITION FOR MORE PROTECTION AND COMFORT – LIGHT VERSION.

X-TREME® light offers heat protection that significantly exceeds the values set out in the European norm EN 469, whether in direct contact with flames or heat radiation. When developing X-TREME light, the focus has been strongly on the weight. X-TREME® light combines excellent protection with significantly improved comfort, supported by the material's light weight.

## Material composition

X-TREME® light is made up of three layers: outer layer, intermediate layer (Heat Comfort Barrier) and membrane / flameline (GORE-TEX Flameline® G and GORE-TEX moisture barrier with GORE® CROSSTECH® product technology)

## FIRE DRAGON

## PRECISION FIT AND INDIVIDUALITY FOR THE NETHERLANDS

The FIRE DRAGON, consisting of FIRE DRAGON jacket NL Utrecht as well as FIRE SURVIVOR trousers NL Utrecht, is a customised fire-fighting suit designed for the specialised requirements of Dutch fire-fighting brigades. The suit combines a perfect fit, high-quality workmanship as well as optimal visibility in a special Dutch house style, combined with the individual requirements on the equipment. The identification collar NL which is available separately can be affixed to the jacket using the integrated velcro fastener.
