FIRE BEAST

HIGHEST PROTECTION, BEST DESIGN,
OPTIMAL FUNCTIONALITY.

TEXPORT.AT

WE ARE ONLY SATISFIED WITH THE VERY BEST

AIR XBLOCKER®

The insulation system in the shoulder area guarantees more safety through a permanent air cushion that rises from protectors in the inner lining and also stays upright when carrying respiratory protective equipment. The trapped air isolates this exposed area.

HPX SYSTEM®

With the HPX System®, changing a defective zip is no longer expensive and complicated, but simple and affordable. Through the High Performance eXchange System, or HPX System, the lifespan of protective clothing is increased significantly. In addition, thanks to the striking design it is immediately visible whether or not the front part is fully closed. That makes it even safer.

EU Patent 07121066.0

TEXPORT TRIPLE FABRIC®

The TEXPORT Triple Fabric® is a textile reflective stripe that is made from fabric and therefore is extremely breathable and more durable. The reflective, silverstripe material composition, patented by 3M*, adheres very well to the structure of the soft fabric. In addition, the TEXPORT Triple Fabric® is abraded less severely through wear and washing.

EU Patent 08102991.0

*3M EU Patent 1974621

ERGO XPAD®

The TEXPORT Ergopad® is a cushioned, ergonomically preformed knee pad that fits the knee in every place and avoids creating pressure marks. It is flameresistant and does not become saturated with water, in contrast to the aramid non-woven padding, so that the trousers dry much more quickly after washing.

WICKING X BARRIER®

The wicking barrier is permanently waterproof, breathable and wash-resistant. That means even after many uses and washes, the clothing's lining remains completely dry thanks to the GORE-TEX barrier, as no more moisture can enter through the seams.

▷ Stand-up collar (width adjustable, with hanger)

▷ Radio pocket (length and width adjustable)

▷ Rank tab (grade identification)

▷ Flashlight loop (triple lock, width adjustable)

▷ Grab tab (textile, signal color)

▷ Cuff (width adjustable, with thermo wristlet)

▷ Inspection openings (internal)

▷ Adjustable waist (individually adjustable)

▷ Pockets (inserted pocket and reach-through)

▷ Cargo pockets (External, right-hand side with knife pocket, reinforced flap)

▷ Knee reinforcement (abrasion protection)

▷ Cuff outside (abrasion protection, inner leg and hem)

▷ Cuff inside (dirt protection)

▷ Cuff backside (heel cut-out)

Texport Triple Fabric Segmented

THE INNOVATIVE MATERIAL COMPOSITION FOR EXTREME PROTECTION AND COMFORT.

When fighting fires, two serious dangers are direct flames and heat radiation. If the heat penetrates the material of the protective clothing, it can lead to burns to the body. The thermal insulation can delay this decisively – by just those few seconds that are required. Therefore, TEXTOR has developed the material composition X-TREME®. X-TREME® offers notably more protection and comfort (thanks to its innovative material composition and new high-tech intermediate layer) than is required by the European EN 469 norm. The heat radiation is blocked for a long period of time.

Material composition

X-TREME® is made up of four layers:
Outer layer, intermediate layer (TNX, Heat Comfort Barrier), membrane (GORE-TEX Fireblocker® N and GORE-TEX moisture barrier with GORE® CROSSTECH® product technologies) and lining (Nomex®/viscose)

Based on demands of EN 469	
Increased protection from direct contact with flames	+ 86 %
Increased protection from heat radiation	+ 35 %
Better breathability	+ 60 %

Results (HTI, RHTI, Ret) provided by OETI (Institute for Ecology, Technology and Innovation), Test Report 80097.

* GORE-TEX moisture barrier with GORE® CROSSTECH® product technology

THE INNOVATIVE MATERIAL COMPOSITION FOR MORE PROTECTION AND COMFORT – LIGHT VERSION.

X-TREME® light offers heat protection that significantly exceeds the values set out in the European norm EN 469, whether in direct contact with flames or heat radiation. When developing X-TREME light, the focus has been strongly on the weight. X-TREME® light combines excellent protection with significantly improved comfort, supported by the material's light weight.

Material composition

X-TREME® light is made up of three layers:
Outer layer, intermediate layer (heat comfort barrier) and membrane/flameliner (GORE-TEX Flameliner® G and GORE-TEX® moisture barrier with GORE® CROSSTECH® product technology)

Weight reduction compared with X-TREME®	+ 16 %
Improved breathability compared with X-TREME®	+ 20 %

The weight reduction in X-TREME® light is in an area that has a noticeable effect on the comfort of the emergency forces wearing it.

THE BEAST FOR MAXIMUM PROTECTION

The Fire Beast Series from TEXTOR is a fight-fighting uniform specially designed for the British market. The Fire Beast suit offers optimal protection with the best performance and design.
