- › Cargo pockets (external)
- › Knee reinforcement (abrasion protection)
- › Cuff outside (abrasion protection, inner leg and hem)
- › Cuff backside (width adjustable, with heel cut-out)

OPTIMUM AND EASE FOR TECHNICAL ASSISTANCE

The Guardian RSQ is a light suit for rescue operations and technical assistance. It has a modern cut and combines a modern, highly visible design with an especially ergonomic cut and all features which are demanded by firemen for complex missions. With the optionally available and adaptable hood, the Guardian RSQ offers optimal protection in every weather situation.

THE INNOVATIVE MATERIAL COMPOSITION FOR MORE PROTECTION AND COMFORT – LIGHT VERSION.

X-TREME® light offers heat protection that significantly exceeds the values set out in the European norm EN 469, whether in direct contact with flames or heat radiation. When developing X-TREME light, the focus has been strongly on the weight. X-TREME® light combines excellent protection with significantly improved comfort, supported by the material's light weight.

Material composition

X-TREME® light is made up of three layers: outer layer, intermediate layer (Heat Comfort Barrier) and membrane / flamelineer (GORE-TEX Flamelineer® G and GORE-TEX moisture barrier with GORE® CROSSTECH® product technology)

WE ARE ONLY SATISFIED WITH THE VERY BEST

With the HPX System®, changing a defective zip is no longer expensive and complicated, but simple and affordable. Through the High Performance eXchange System, or HPX System, the lifespan of protective clothing is increased significantly. In addition, thanks to the striking design it is immediately visible whether or not the front part is fully closed. That makes it even safer.

EU Patent 07121066.0

The TEXTPORT® Triple Fabric® is a textile reflective stripe that is made from fabric and therefore is extremely breathable and more durable. The reflective, silverstripe material composition, patented by 3M*, adheres very well to the structure of the soft fabric. In addition, the TEXTPORT® Triple Fabric® is abraded less severely through wear and washing.

EU Patent 08102991.0
*3M EU Patent 1974621

The TEXTPORT® Ergopad® is a cushioned, ergonomically preformed knee pad that fits the knee in every place and avoids creating pressure marks. It is flameresistant and does not become saturated with water, in contrast to the aramid non-woven padding, so that the trousers dry much more quickly after washing.

The wicking barrier is permanently waterproof, breathable and wash-resistant. That means even after many uses and washes, the clothing's lining remains completely dry thanks to the GORE-TEX barrier, as no more moisture can enter through the seams.
